PIG RESTART

VITAMIN & ELECTROLYTE REPLACER

Vet Only – Pig Restart Vitamin & Electrolyte

Cases requiring Vitamin and Electrolyte use.

- **Suckers**

1. Scours
2. Reduced milk and feed intakes
3. Il-thrifty piglets

- **Weaners**

1. Post weaning scours
2. Reduced Feed intakes
3. Mixing and movement stress
4. Vitamin E deficiencies
5. Using long stored or processed feeds

Vet Only – Pig Restart Vitamin & Electrolyte

Vitamin	Need for	Deficiency
A (fat soluble)	Cell structure, vision, normal bones and teeth, healthy skin and coat also normal mucous membranes.	Impaired vision and hearing. Impaired respiratory tract lining. Poor skin and coat.
B Complex (water soluble)	Must be provided on a daily basis, as the pig cannot store water soluble vitamins. They aid in growth and appetite. Supplementation definitely should be considered for pigs that have reduced appetites due to stress, mixing, and adaptation to dry feeds.	Anaemia, poor appetite, disturbance in growth patterns, neurological disorders and nervous disposition.
D (fat soluble)	Transportation of calcium for bone building. Vitamin D plays a major part of the Bone Building triangle.	Impaired growth, Bone deformities, bone soreness
E (fat soluble)	Protects cell membranes from free radicals and maintains healthy skin and coat, promotes normal growth, reproduction, muscle and nervous system function.	Reproductive failure and impairment, muscular problems, lethargy, impaired calcium uptake and a build up of free radicals.

Vet Only – Pig Restart Vitamin & Electrolyte

Common Uses:

Pig Restart has been scientifically formulated by swine veterinarians as an electrolyte for pigs during periods of dehydration to facilitate in:

1. Preventing dehydration during heat stressevents
2. Replacement of electrolyte and vitamin loss during scours
3. Recovery from neonatal inappetence
4. Recovery from post weaning inappetence
5. Recovery from scours
6. Sick bay use to aid in recovery of any infectious disease or sickness.
7. Can be used in conjunction with any antibacterial treatments.

Vet Only – Pig Restart Vitamin & Electrolyte

Ingredients;
Vitamins: A, B2, B6, B1, B12, Niacin, C,
D, E, K3.
Calcium, Biotin, Microcrystalline cellulose,
Sodium Chloride, Sodium Citrate, Potassium Chloride,
Sodium Bicarbonate, Pre-gelatinised starch, Raspberry
Flavouring, and Dextrose.

Directions:
Pig Restart is for oral use in pigs, use at a rate of 50g to 2.5 litres of water. This amount can be administered twice daily via the drinking bowl or a syringe. Occasionally it may be Necessary to force feed an animal.

Sizes available:
1kg, 12.5kg
